9WEB DEVELOPMENT ACTIVITY-BASED LEARNING

Sweet and Cake Bakery Website

1. Problem Statement

Traditional bakeries often depend on physical stores to display and sell their products. Customers may find it difficult to explore different cake designs, sweets, pastries, prices, and special offers before visiting the shop. A Sweet and Cake Bakery website provides an online platform where customers can view bakery products, check prices, explore custom cake designs, and learn about special offers and contact details.

2. Objective

The main objective is to develop an attractive, user-friendly, and responsive bakery website that
showcases a variety of cakes, sweets, pastries, cookies, and other bakery products. The website aims to promote bakery products online, provide product information, attract customers,
and make it easier to inquire about or order bakery items.

3. Key Features

4. Home Page: Displays the bakery name, welcome message, featured cakes, and special offers.

2. Product Gallery: Showcases cakes, sweets, pastries, cookies, and desserts with attractive images.

3. Product Prices: Displays the prices and descriptions of available products.

4. Custom Cake Designs: Presents birthday cakes, wedding cakes, anniversary cakes, and themed cakes.

5. Special Offers: Highlights festival discounts, seasonal offers, and combo packages.

6. Online Ordering: Allows customers to select products and place orders.

7. Shopping Cart: Enables customers to review selected products and quantities.

8. About Us: Provides information about the bakery, its quality, and its services.

9. Contact Information: Displays the bakery address, phone number, email, and business hours.

10. Responsive Design: Ensures the website works on mobiles, tablets, and computers.

11. Interactive Navigation: Helps users move easily between different sections.

12. Customer Reviews: Displays feedback and ratings from customers.

13. Applications

● Product Promotion: Advertises cakes, sweets, pastries, and bakery products.

● Online Cake Booking: Allows customers to request customized cakes for special occasions.

● Business Growth: Helps the bakery reach more customers online.

● Festival Sales: Promotes special products for Diwali, Christmas, birthdays, and other celebrations.

● Customer Convenience: Enables customers to explore products and prices before visiting the shop.

● Order Management: Helps organize customer orders and delivery requests.

● Brand Awareness: Builds the bakery's online identity through an attractive website.

● Customer Communication: Makes it easier for customers to contact the bakery for inquiries.

Conclusion: The Sweet and Cake Bakery website provides an attractive digital platform to showcase bakery products, promote special offers, and help customers explore and order cakes

and sweets conveniently.
